

Resources

If you'd like to learn more about your Scholantis system and discover how advanced features we have collated some useful resources for you to explore.

Your Scholantis solution is built on the Microsoft SharePoint platform. When reviewing SharePoint resources online please note that your site has been customised so features may not appear the same. The exact customisations and features available will depend on many factors such as the version of SharePoint or whether you're using it for your website or as a collaboration portal.
