

Frequently Asked Questions (FAQ)

Consult this page for common questions and concerns. Updated regularly.

✓ [What is visible if my Portal is set to Public \(anonymous\)?](#)

✓ [How do I change the name of my class or group site?](#)

To change the name of your class or group, simply edit the Title field using the [Manage a Class or Group Site](#) wizard.

✓ [How do I add comments inside the student Assignments?](#)

You can also [Comment on Assignments](#) directly on the Assignments page.

✓ [Which files can I upload?](#)

See the topic: [Which Files Can I Upload?](#)

✓ [My smartphone won't save my ADFS password. How do I add it?](#)

If your smart phone is not offering to save your password when you log into ADFS, here are the steps to take:

For Android:

- Open the Chrome app.
- At the top right, tap **More**.
- Tap **Settings** and then **Smart Lock for Passwords** or **Save passwords**.
- Tap the link for **View and manage saved passwords at passwords.google.com**.

(For chrome on IOS you need to have a Google account, it saves your passwords from your desktop and will sync it from there.)

For iPhone:

- Go to your **Settings**.
- Go to **Safari > Autofill** and make sure **Names and Passwords** is enabled.
- Once enabled, go back into Safari settings and click **Passwords**.
- Click **Add Password**.
- Enter the **Website URL** (you can copy and paste in your district's URL) and type in your **User name** and **Password** in the fields provided.
- Then hit the **Done** (or Save) to save your changes.
- When you go to that URL, in the password and username field there will be an Autofill called passwords. Here you can select the correct authentication by username and site URL.
